I.18.		I.19.	
I.20. Total quantity		I.21. Temperature of the product Ambient <input type="checkbox"/> Chilled <input type="checkbox"/> Frozen <input type="checkbox"/>	
I.22. Total number of packages		I.23. Identification of container/Seal number	
I.24.		I.25. Commodities intended for use as: Artificial reproduction <input type="checkbox"/>	
I.26.	I.27.		

I.28. Identification of the commodities: See attached list if necessary

Breed	Embryo ID	Category (Penetration or Non Penetration of zona pellucida)	Approval number of the embryoteam	Flushing protocol No

Part II: Certification

Country: NORWAY

Veterinary certificate to: Iceland

II.a. Certificate reference number

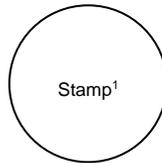

II.b. Replacement certificate reference number

I, the undersigned Official Veterinarian, hereby certify that the embryos described in this certificate:

- a) The embryos were produced by an approved embryo collection team.
- b) The donor cows were born and raised in Norway and have been present in the herd of origin for at least 30 days prior to collection of the embryos.
- c) The approved embryo collection team and the approved embryo storage center shall have a valid license from the Norwegian Food Safety Authority to collect, process and store embryos. No deviations that can increase the risk of contagious diseases shall have been detected at surveillance.
- d) The approved embryo storage center and the units in which the donor cows were kept have been free from those notifiable animal diseases in accordance to articles 2 and 3 of the Icelandic regulation 52/2014 on notifiable animal diseases in the period from 90 days prior and up to 60 days after embryo collection.
- e) The approved embryo collection team and the approved embryo storage center in Norway shall meet the requirements set by the competent authorities in Norway regarding processing, storage and import and export of embryos with no deviations registered with said authorities related to the health of the animals or the embryos.
- f) The donor cows were in good health before, during and after collection of the embryos. They have not been vaccinated against any diseases during the last 12 months and have been tested for the following diseases in approved laboratories with negative results:
 - 1. *Coxiella burnetti* (Q-fever)
 - 2. *E. coli* O157:H7
 - 3. *Flaviviridae Pestivirus* BVDV1 (bovine virus diarrhea)
 - 4. *Leptospirosis*
 - 5. *Mycobacterium avium paratuberculosis* (paratuberculosis)
 - 6. *Mycobacterium bovis* (Bovine tuberculosis)
 - 7. *Tritrichomonas foetus*
