

Veiledning for utfylling av 5.1.351 Storbritannia, helsesertifikat, rått kjæledyrefôr eller animalske biprodukt til pelsdyr, GBHC 562

Veiledning om utfylling av del 1.

Veiledning for hva som skal fylles ut i de ulike feltene i del 1 av sertifikatet finnes her:

<https://www.gov.uk/government/publications/how-to-complete-a-health-certificate-for-imports-to-great-britain/how-to-complete-a-health-certificate-for-imports-to-great-britain>

Det er eksportør som er ansvarlig for at innholdet i sertifikatet er korrekt.

Veiledning om utfylling av del 2.

Part III. Notes for completion

These notes for completion must be read and understood by the certifying officer before signing the certificate. Notes are set out in sections that correspond to the sections in the certificate. By signing this certificate, certifiers are verifying that the consignment meets the requirements set out in the certificate and any relevant corresponding notes for completion.

These notes do not need to be printed as part of a paper certificate that accompanies the consignment or in any electronic copy of the certificate.

References to European Union legislation within this certificate are references to direct EU legislation which has been retained in Great Britain (retained EU law as defined in the European Union (Withdrawal) Act 2018) and can be viewed on the UK legislation website (legislation.gov.uk).

References to Great Britain in this certificate include Channel Islands and Isle of Man.

References to GB requirements refer to the requirement(s) of Great Britain as set out in the accompanying notes for completion.

Part I

- | | |
|---------------------|--|
| Box reference I.6: | <i>Person responsible for the consignment in Great Britain:</i> this box is required to be filled in only if it is a certificate for a commodity to be transited through Great Britain; it may be filled in if the certificate is for a commodity that is to be imported into Great Britain. |
| Box reference I.12: | <i>Place of destination:</i> this box is to be filled in only if it is a certificate for transit commodity. Products in transit may only be stored in free zones, free warehouses and custom warehouses. |
| Box reference I.15: | Registration number (railway wagons or container and lorries), flight number (aircraft) or name (ship) is to be provided. In the case of unloading and reloading, the consignor must inform the border control post of the point of entry into Great Britain. |
| Box reference I.19: | Use the appropriate Harmonized System (HS) code under the following heading: 04.08; 05.06; 05.08; 05.11, 23.01 or 23.09. |
| Box reference I.23: | For bulk containers, the container number and the seal number (if applicable) must be included. |
| Box reference I.25: | <i>Technical use:</i> any use other than feeding of farmed animals, other than fur animals, and the production or manufacturing of pet food. |

Box reference I.26 and I.27: Fill in according to whether it is a transit or an import certificate. Box reference I.28: *Nature of commodity*: select raw petfood or animal by-product.

In the case of raw material for the manufacture of raw pet food indicate the scientific name of the species.

In case of raw material for manufacture of feed for fur animals select from the following: *Aves*, *Ruminantia*, *Suidae*, *Mammalia* other than *Ruminantia* or *Suidae*, *Pesca*, *Mollusca*, *Crustacea*, Invertebrates other than *Mollusca* and *Crustacea*.

Part II

Animal Health

By signing this certificate, you, the official veterinarian, are certifying that you have read and understood Regulation (EC) No 1069/2009 and in particular Article 10 thereof, and Commission Regulation (EU) No 142/2011, and in particular Chapter II of Annex XIII and Chapter II of Annex XIV thereto.

AH/T006 Territory requirements

(a) GB animal and public health requirements

Insert ISO code in the case of a country, or codes in the case of territories or parts thereof.

The animal by-product must be derived from meat which satisfies the relevant animal and public health requirements laid down in:

- Fresh meat of ungulates: Commission Regulation (EU) No 206/2010 and provided that the animals from which the meat is derived come from the third countries, territories or parts thereof as set out in a document relating to 'fresh meat of ungulates' published on GOV.UK, in accordance with Commission Regulation (EU) No 206/2010.^(†)
- Poultry and poultry products: Commission Regulation (EC) No 798/2008, and provided that the animals from which the meat is derived come from the third countries, territories or parts thereof as set out in a document relating to 'poultry and poultry products' published on GOV.UK, in accordance with Commission Regulation (EC) No 798/2008^(†) which has been free from Newcastle disease and avian influenza for the last 12 months.
- Meat of wild leporidae, certain wild land mammals and of farmed rabbits: Commission Regulation (EC) No 119/2009, and provided that the animals from which the meat is derived come from the third countries, territories or parts thereof as set out in a document relating to 'meat of wild leporidae, certain wild land mammals and of farmed rabbits' published on GOV.UK, in accordance with Commission Regulation No 119/2009^(†) which has been free from foot and mouth disease, rinderpest, classical swine fever, African swine fever, swine vesicular disease, Newcastle disease and avian influenza for the preceding 12 months and where no vaccination has taken place during that time (only where relevant for the susceptible species).

(b) Slaughtered and handled in the slaughterhouse in accordance with GB requirements:

- derived from animals that, at the slaughterhouse, have passed the ante-mortem health inspection during the period of 24 hours before the time of slaughter and have shown no evidence of the diseases referred in the Regulations referred to in point (a) for which the animals are susceptible; and
- derived from animals that have been handled in the slaughterhouse before and at the time of slaughter or killing in accordance with the relevant provisions of retained EU law and have met requirements at least equivalent to those laid down in Chapters II and III of Council Regulation (EC) No 1099/2009

(c) Feed for fur animals:

Insert ISO code of the country as listed in Annex II of Commission Implementing Regulation (EU) 2019/626.

Animal by-products must be derived from aquatic animals which satisfy the relevant animal and public health requirements laid down in Commission Implementing Regulation (EU) 2019/626.

AH/P006 Product requirements (segregation)

Conditions laid down in the Regulation (EC) No 1069/2009.

AH/P102 Product requirements (composition)

No further notes for completion.

AH/P103 Additional requirements for feed for fur animals

One or more options can be selected.

- A:** Animal by-products from poultry and lagomorphs slaughtered on the farm as referred to in Article I(3)(d) of Regulation (EC) No 853/2004 of the European Parliament and of the Council, which did not show any signs of disease communicable to humans or animals.
- B:** Blood of animals which did not show any signs of disease communicable through blood to humans or animals, obtained from animals that have been slaughtered in a slaughterhouse after having been considered fit for slaughter for human consumption following an ante-mortem inspection in accordance with retained EU law.
- C:** Animal by-products arising from the production of products intended for human consumption, including degreased bone, greaves and centrifuge or separator sludge from milk processing.
- D:** Products of animal origin, or foodstuffs containing products of animal origin, which are no longer intended for human consumption for commercial reasons or due to problems of manufacturing or packaging defects or other defects from which no risk to public or animal health arises.
- E:** Petfood and feedingstuffs of animal origin, or feedingstuffs containing animal by-products or derived products, which are no longer intended for feeding for commercial reasons or due to problems of manufacturing or packaging defects or other defects from which no risk to public or animal health arise.
- F:** Blood, placenta, wool, feathers, hair, horns, hoof cuts and raw milk originating from live animals that did not show signs of any disease communicable through that product to humans or animals.
- G:** Aquatic animals, and parts of such animals, except sea mammals, which did not show any signs of diseases communicable to humans or animals.
- H:** Animal by-products from aquatic animals originating from plants or establishments manufacturing products for human consumption.
- I:** The following material originating from animals which did not show any signs of disease communicable through that material to humans or animals:
 - (i)** shells from shellfish with soft tissue or flesh;
 - (ii)** the following originating from terrestrial animals:
 - hatchery by-products,
 - eggs,
 - egg by-products, including egg shells,
 - (iii)** day-old chicks killed for commercial reasons.
- J:** Animal by-products from aquatic or terrestrial invertebrates other than species pathogenic to humans or animals.
- K:** Animals and parts thereof of the zoological orders of Rodentia and Lagomorpha, except Category 1 material as referred to in Article 8(a)(iii), (iv) and (v) of Regulation (EC) No 1069/2009 and Category 2 material as referred to in Article 9(a) to (g) of that Regulation.

AH/P505 Packaging and labelling

No further notes for completion.

AH/P801 Approved establishment and testing

The raw pet food must be prepared and stored in a plant approved and supervised by the competent authority in accordance with Article 24 of Regulation (EC) No 1069/2009.

Examined by random sampling of at least five samples from each batch taken during storage (before dispatch) and complies with the following standards:

- Salmonella: absence in 25 g: n=5, c=0, m=0, M=0
- Enterobacteriaceae: n=5, c=2, m=10, M=5000 in 1 gram

Where:

n = number of samples to be tested;

m = threshold value for the number of bacteria; the result is considered satisfactory if the number of bacteria in all samples does not exceed m;

M = maximum value for the number of bacteria; the result is considered unsatisfactory if the number of bacteria in one or more samples is M or more; and

c = number of samples the bacterial count of which may be between m and M, the sample still being considered acceptable if the bacterial count of the other samples is m or less.

Public Health

(*)PH/D010 Bovine spongiform encephalopathy (BSE)

The animal by-products described in Part I of this certificate contain or are derived from animal-by products of ruminant origin and:

- (a) EITHER** originates from a country or region, which is classified as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001^(*), and in which there have been no indigenous BSE cases;
- AND/OR** originates from a country or region classified as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001^(*) in which there has been an indigenous BSE case, and the animal by-product or derived product were derived from animals born after the date from which the ban on the feeding of ruminants with meat-and-bone meal and greaves derived from ruminants, as defined in the World Organisation for Animal Health (WOAH (formerly OIE)) Terrestrial Animal Health Code, has been effectively enforced in that country or region.

and

- (b) EITHER** is derived from other ruminants than bovine, ovine or caprine animals;
- OR** is derived from bovine, ovine or caprine animals and does not contain and is not derived from:
- EITHER** (i) bovine, ovine and caprine materials other than those derived from animals born, continuously reared and slaughtered in a country or region classified as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001^(*);
- OR** (ii) the following:
- (1)** specified risk material as defined in point 1 of Annex V to Regulation (EC) No 999/2001 of the European Parliament and of the Council and

mechanically separated meat obtained from bones of bovine, ovine or caprine animals, except from those animals that were born, continuously reared and slaughtered in a country or region classified as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001^(†), in which there have been no indigenous BSE cases.

- (2)** animal by-product or derived product obtained from bovine, ovine or caprine animals which have been killed, after stunning, by laceration of the central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, or by means of gas injected into the cranial cavity, except for those animals that were born, continuously reared and slaughtered in a country or region classified as posing a negligible BSE risk as set out in a document relating to 'BSE risk status' published on GOV.UK, in accordance with Regulation (EC) No 999/2001^(†).
