Et risikobilde i endring

- **Geopolitikk** og **sikkerhetspolitikk**
- **Klimaendringer** og behov for **klimatilpasning** og mer bærekraftige matsystemer
- **Teknologi** – nye muligheter og nye sårbarheter
- **Kampen om hodene** og **kampen om sannheten**
- **Stramme budsjetter** og **mangel på ressurser**

FAO Food Price Index in nominal and real terms

2014-2016=100

* The real price index is the nominal price index deflated by the World Bank Manufactures Unit Value Index (MUV)

Meat giant JBS pays \$11m in ransom to resolve cyber-attack

Figure 3.4.1.2-1 Mean concentrations of caesium-137 (Bq/m²) fallout in soil in different municipalities after the Chernobyl disaster in 1986 (Backe et al., 1986), as well as the corresponding concentration in 2016 as corrected due to physical decay.

Figure 4.2.3-3 Number of sheep subject to “clean-feeding” before slaughtering, and number of municipalities in which this countermeasure was applied from 1986–2016. Data provided by the Norwegian Agriculture Agency based on applications for financial compensation submitted by sheep farmers.

Europeisk og nordisk samarbeid

- 90% av regelverket vi forvalter er EU-regelverk, utgjør 40 % av EØS-avtalen
- EU forenkler og skal ha mindre byråkrati og mer innovasjon og konkurransekraft
- Norden skal være verdens mest bærekraftige og integrerte region. Grønt, konkurransedyktig og sosialt bærekraftig

Hvordan kommer vi dit?

- Digitale verktøy og handlingsrom som muliggjør et effektivt og risikobasert tilsyn
- Samarbeid om felles interesser, viktigere enn noen gang

NATOs 7 baseline requirements

1. Assured **continuity of government** and critical government services: for instance, the ability to make decisions and communicate with citizens in a crisis
2. Resilient **energy supplies**: ensuring a continued supply of energy and having back-up plans to manage disruptions
3. Ability to deal effectively with the **uncontrolled movement of people** and to de-conflict these movements from NATO's military deployments
4. Resilient **food and water resources**: ensuring resilient supplies that are safe from disruption or sabotage
5. Ability to deal with **mass casualties and disruptive health crises**: ensuring that civilian health systems can cope and that sufficient medical supplies are stocked and secure
6. Resilient **civil communications systems**: ensuring that telecommunications and cyber networks can function even under crisis conditions, with sufficient back-up capacity. This also includes the need for reliable communications systems including 5G, robust options to restore these systems, priority access to national authorities in times of crisis, and the thorough assessments of all risks to communications systems
7. Resilient **transport systems**: ensuring that NATO forces can move across Alliance territory rapidly and that civilian services can rely on transportation networks, even in a crisis

Mattilsynets rolle i totalforsvaret

Viktige oppgaver i øvelser, kriser og krig

- Forebygge og forberede for å sikre robust tilgang til mat og vann
- Bidra til inn- og utførsel av mat til og fra Norge
- Opprettholde tillit til at mat og drikkevann er trygt
- Hindre mat- og vannbåren smitte som kan svekke operativ evne
- Delta i øvelser

Vi utvikler oss for å håndtere et endret risikobilde
