¹ where

n = number of units comprising the sample;
c = number and sample units the bacterial count of which may be between m and M, the sample still being considered acceptable if the bacterial count of the other sample units is m or less;
m = threshold value for the number of bacteria; the result is considered satisfactorily if the number of bacteria in all sample units does not exceed

m; M = maximum value for the number of bacteria; the result is considered unsatisfactorily if the number of bacteria in one or more

sample units is M or more. ² The signature and stamp must be in a colour different to that of the printing.
