

Veiledning for utfylling av 11.1.318 Storbritannia, helsesertifikat, levende fisk og fiskeavlsmateriale, GBHC670

Veiledning om utfylling av del 1

Veiledning for hva som skal fylles ut i de ulike feltene i del 1 av sertifikatet finnes her: [How to complete a health certificate to export to Great Britain](#)

I noen tilfeller kan kravene til hva som skal fylles ut i de ulike rubrikkene avvike fra den generelle veiledningen på den britiske nettsiden. Dette står i så fall spesifisert i «notes for completion» for det enkelte sertifikat.

Det er eksportør som er ansvarlig for at innholdet i sertifikatet er korrekt.

Veiledning om utfylling av del 2

«Notes for completion» må være lest, forstått og oppfylt før sertifikatet kan utstedes. «Notes for completion» gir f.eks. forklaringer til hva henvisningene til britisk regelverk innebærer i de ulike punktene i sertifiseringsdelen i sertifikatet (del 2).

Part III. Notes for completion

These notes for completion must be read and understood by the certifying officer before signing the certificate. Notes are set out in sections that correspond to the sections in the certificate. By signing this certificate, certifiers are verifying that the consignment meets the requirements set out in the certificate and any relevant corresponding notes for completion.

These notes do not need to be printed as part of a paper certificate that accompanies the consignment or in any electronic copy of the certificate.

References to European Union legislation within this certificate are references to direct EU legislation which has been retained in Great Britain (retained EU law as defined in the European Union (Withdrawal) Act 2018) and can be viewed on the UK legislation website (legislation.gov.uk).

References to Great Britain in this certificate include Channel Islands and Isle of Man.

References to GB requirements refer to the requirement(s) of Great Britain as set out in the accompanying notes for completion.

Part I

- Box reference I.19: Use the appropriate Harmonised System (HS) codes of the World Customs Organisation of the following headings: 0301, 0306, 0307, 0308 or 0511.
- Box reference I.20 and I.28: As regards quantity, give the total number in kg, except for the ornamental fish.
- Box reference I.25: Use the option "Breeding" if intended for farming, "Relaying" if intended for relaying, "Pets" for ornamental aquatic animals intended for pet shops or similar businesses for further sale, "Circus/exhibition" for ornamental aquatic animals intended for exhibition aquaria or similar businesses not for further sale, "Quarantine" if the aquaculture animals are intended for an approved quarantine facility, and "Other" if intended for put and take fisheries.

Part II

Animal Health

AH/T156A Territory requirements (freedom from disease)

This attestation applies where the consignment contains species susceptible to Epizootic haematopoietic necrosis (EHN), *Bonamia exitiosa*, *Perkinsus marinus*, *Mikrocytos mackini*, Taura syndrome and/or Yellowhead disease.

Susceptible species are listed in table B of the document published by the Secretary of State, with the consent of the Scottish Ministers and Welsh Ministers, in accordance with Article 3A of Regulation No 1251/2008.

Published lists of susceptible and vector species are accessible at:

<https://www.gov.uk/guidance/import-or-export-live-fish-and-shellfish>

To be authorised into Great Britain one of these statements must be kept if the consignments contain susceptible species to EHN, *Bonamia exitiosa*, *Perkinsus marinus*, *Mikrocytos mackini*, Taura syndrome and/or Yellowhead disease.

Consignments of wild aquatic animals may be imported regardless of this requirement if they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946.

Relevant GB requirements

The country, territory, zone or compartment must be declared free in accordance with the relevant WOH Standard by the competent authority of the country of origin, or via a process equivalent to Decision 2009/177.

For the free country, territory, zone or compartment:

- (a) the relevant diseases are notifiable to the competent authority and reports of suspicion of infection of the relevant diseases must be immediately investigated by the competent authority
- (b) all introduction of species susceptible to the relevant diseases come from an area declared free of the diseases, and
- (c) species susceptible to the relevant diseases are not vaccinated against the relevant diseases

For wild aquatic animals subject to quarantine, this must have been in accordance with Decision 2008/946

AH/T156B Territory requirements (freedom from disease)

This attestation applies where the consignment contains vector species to Epizootic haematopoietic necrosis (EHN), *Bonamia exitiosa*, *Perkinsus marinus*, *Mikrocytos mackini*, Taura syndrome and/or Yellowhead disease.

Possible vector species and the conditions, under which consignments of such species are to be considered vector species, are listed in table A of the document published by the Secretary of State, with the consent of the Scottish and Welsh Ministers in accordance with Article 3 of Regulation No 1251/2008.

Animals are regarded as possible vectors where they are species listed in Column 2 and fulfil the conditions set out in Column 3 of table A.

To be authorised into Great Britain one of these statements must be kept if the consignments contain vector species to EHN, *Bonamia exitiosa*, *Perkinsus marinus*, *Mikrocytos mackini*, Taura syndrome and/or Yellowhead disease.

Consignments of possible vector species may be imported regardless of this requirement if the conditions set out in Column 4 of table A of the document published by the Secretary of State, with the consent of the Scottish and Welsh Ministers in accordance with Article 3 of Regulation No 1251/2008 are not fulfilled or they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946.

Relevant GB Requirements

The country, territory, zone or compartment must be declared free in accordance with the relevant WOA Standard by the competent authority of the country of origin, or via a process equivalent to Decision 2009/177.

For the free country, territory, zone or compartment:

- (a)** the relevant diseases are notifiable to the competent authority and reports of suspicion of infection of the relevant diseases must be immediately investigated by the competent authority
- (b)** all introduction of species susceptible to the relevant diseases come from an area declared free of the diseases, and
- (c)** species susceptible to the relevant diseases are not vaccinated against the relevant diseases

For wild aquatic animals subject to quarantine, this must have been in accordance with Decision 2008/946

AH/T157A Territory requirements (freedom from disease)

This attestation applies where the consignment contains species susceptible to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (ISA) (genotype HPR deleted), Koi herpes virus (KHV), *Marteilia refringens*, *Bonamia ostreae*, and/or White spot disease.

Susceptible species are listed in table B of the document published by the Secretary of State, with the consent of the Scottish Ministers and Welsh Ministers, in accordance with Article 3A of Commission Regulation No 1251/2008.

Published lists of susceptible and vector species are accessible at:

<https://www.gov.uk/guidance/import-or-export-live-fish-and-shellfish>

Where applicable, to be authorised into Great Britain, zone or compartment declared free from VHS, IHN, ISA, KHV, *Marteilia refringens*, *Bonamia ostreae*, or Whitespot disease or with a surveillance or eradication programme equivalent to one drawn up in accordance with Decision 2008/896, one of these

statements must be kept if the consignment contains susceptible or vector species to the disease(s) for which disease freedom or programme(s) apply(ies). Data on the disease status of each farm and mollusc farming area in Great Britain are accessible at

<https://www.gov.uk/government/groups/fish-health-inspectorate#disease-status-of-fish-shellfish-and-crustacea-in-england-and-wales>

<https://www.gov.scot/publications/registers-of-authorised-aquaculture-production-businesses-and-authorised-processing-establishments/>

<https://www.gov.scot/publications/health-status-of-fish-and-shellfish-diseases-in-scotland/>

Consignments of wild aquatic animals may be imported regardless of this requirement if they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946.

Relevant GB requirements

The country, territory, zone or compartment must be declared free in accordance with the relevant WOA Standard by the competent authority of the country of origin, or via a process equivalent to Decision 2009/177.

For the free country, territory, zone or compartment:

- (a) the relevant diseases are notifiable to the competent authority and reports of suspicion of infection of the relevant diseases must be immediately investigated by the competent authority
- (b) all introduction of species susceptible to the relevant diseases come from an area declared free of the diseases, and
- (c) species susceptible to the relevant diseases are not vaccinated against the relevant diseases

For wild aquatic animals subject to quarantine, this must have been in accordance with Decision 2008/946

AH/T157B Territory requirements (freedom from disease)

This attestation applies where the consignment contains vector species to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (ISA) (genotype HPR deleted), Koi herpes virus (KHV), *Marteilia refringens*, *Bonamia ostreae*, and/or White spot disease.

Possible vector species and the conditions, under which consignments of such species are to be considered vector species, are listed in table A of the document published by the Secretary of State, with the consent of the Scottish and Welsh Ministers in accordance with Article 3 of Commission Regulation No 1251/2008.

Animals are regarded as possible vectors where they are species listed in Column 2 and fulfil the conditions set out in Column 3 of table A.

Consignments of possible vector species may be imported regardless of this requirement if the conditions set out in Column 4 of table A of the document published by the Secretary of State, with the consent of the Scottish and Welsh Ministers in accordance with Article 3 of Commission Regulation No 1251/2008 are not fulfilled or if they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946.

Where applicable, to be authorised into Great Britain, zone or compartment declared free from VHS, IHN, ISA, KHV, *Marteilia refringens*, *Bonamia ostreae*, or Whitespot disease or with a surveillance or eradication programme equivalent to one drawn up in accordance with Decision 2008/896, one of these statements must be kept if the consignment contains vector species to the disease(s) for which disease freedom or programme(s) apply(ies). Data on the disease status of each farm and mollusc farming area in the Great Britain are accessible at

<https://www.gov.uk/government/groups/fish-health-inspectorate#disease-status-of-fish-shellfish-and-crustacea-in-england-and-wales>

<https://www.gov.scot/publications/registers-of-authorised-aquaculture-production-businesses-and-authorised-processing-establishments/>

<https://www.gov.scot/publications/health-status-of-fish-and-shellfish-diseases-in-scotland/>

Relevant GB requirements

The country, territory, zone or compartment must be declared free in accordance with the relevant WOAHS Standard by the competent authority of the country of origin, or via a process equivalent to Decision 2009/177.

For the free country, territory, zone or compartment:

- (a) the relevant diseases are notifiable to the competent authority and reports of suspicion of infection of the relevant diseases must be immediately investigated by the competent authority
- (b) all introduction of species susceptible to the relevant diseases come from an area declared free of the diseases, and
- (c) species susceptible to the relevant diseases are not vaccinated against the relevant diseases For

aquatic animals subject to quarantine, this must have been in accordance with Decision 2008/946

AH/T158A Territory requirements (freedom from disease)

This attestation only applies to consignments intended for Great Britain or part thereof which is regarded as disease-free, or subject to a surveillance or eradication programme for SVC, BKD or GS, and the consignment comprises species listed in table C of the document published by the Secretary of State, with the consent of the Welsh Ministers, in accordance with regulation 3B of the Aquatic Animal Health (England and Wales) Regulations 2009, or species listed in a document published by the Scottish Ministers in accordance with regulation 3B of the Aquatic Animal Health (Scotland) Regulations 2009 as susceptible to the disease(s) for which the disease-free status or programme(s) apply(ies).

This attestation also applies to consignments of fish of any species originating from waters where species listed in table C of the document published by the Secretary of State, with the consent of the Welsh Ministers, in accordance with regulation 3B of the Aquatic Animal Health (England and Wales) Regulations 2009, or species listed in a document published by the Scottish Ministers in accordance with regulation 3B of the Aquatic Animal Health (Scotland) Regulations 2009 as species susceptible to Infection with GS, are present, where those consignments are intended for Great Britain or part thereof listed as free of GS.

Data on the areas of Great Britain or parts thereof which are regarded as disease-free, or subject to a surveillance or eradication programme for SVC, BKD or GS are accessible at:

<https://www.gov.uk/government/groups/fish-health-inspectorate#disease-status-of-fish-shellfish-and-crustacea-in-england-and-wales>

<https://www.gov.scot/publications/health-status-of-fish-and-shellfish-diseases-in-scotland/>

Consignments of wild aquatic animals for which SVC and/or BKD related requirements are applicable, may be imported regardless of this requirement if they are intended for a quarantine facility complying with the requirements laid down in Decision 2008/946.

Relevant GB requirements:

For the free country, territory, zone or compartment:

- (a) the relevant disease(s) is (are) must be notifiable to the competent authority and reports of suspicion of infection of the relevant disease(s) must be immediately investigated by the competent authority,
- (b) all aquaculture animals of species susceptible to the relevant disease(s) introduced into that country/territory or part thereof must comply with the requirements set out in AH/T158A of this certificate
- (c) species susceptible to the relevant disease(s) must not vaccinated against those disease(s).

AH/T159A Territory requirements (freedom from disease)

This attestation only applies to consignments intended for Great Britain or part thereof which is regarded as disease-free, or subject to a surveillance or eradication programme for OsHV-1 μ var, and the consignment comprises species listed in table C of the document published by the Secretary of State, with

the consent of the Welsh Ministers, in accordance with regulation 3B of the Aquatic Animal Health (England and Wales) Regulations 2009, or species listed in a document published by the Scottish Ministers in accordance with regulation 3B of the Aquatic Animal Health (Scotland) Regulations 2009, as susceptible to OsHV-1 μ var.

Data on the areas of Great Britain or parts thereof which are regarded as disease-free, or subject to a surveillance or eradication programme for OsHV-1 μ var are accessible at:

<https://www.gov.uk/government/groups/fish-health-inspectorate#disease-status-of-fish-shellfish-and-crustacea-in-england-and-wales>

<https://www.gov.scot/publications/health-status-of-fish-and-shellfish-diseases-in-scotland/>

The requirements set out here shall not apply to consignments intended for a quarantine facility complying with the requirements at least equivalent to those laid down in Decision 2008/946

Relevant GB requirements

The aquaculture animals in the consignment must originate from a country/territory, zone or compartment:

- (a) where OsHV-1 μ var is notifiable to the competent authority and reports of suspicion of infection of the relevant disease must be immediately investigated by the competent authority,
- (b) where all aquaculture animals of species susceptible to OsHV-1 μ var introduced into that country/territory, zone or compartment comply with the requirements set out in AH/T159A of this certificate.
- (c) which comply with requirements for disease freedom equivalent to those laid down in Decision 2009/177.

For aquaculture animals which have been subject to quarantine this must have been under conditions at least equivalent to those laid down in Decision 2008/946

AH/E421 Establishment requirements

No further notes for completion.

AH/A261 Animal requirements

No further notes for completion

AH/A359A Animal transport

GB requirements:

The aquaculture animals referred to above must be placed under conditions, including with a water quality, that do not alter their health status; and the transport container or well boat prior to loading must be clean and disinfected or previously unused.

AH/A360A Animal transport

No further notes for completion

AH/A721A Animal requirements

No further notes for completion.
