

# BIRD FLU HAS BEEN DETECTED IN THIS AREA

**Bird flu causes severe disease in wild bird population. Help us prevent the spread of the disease.**

- Avoid traffic in areas with many birds and in areas with sick birds.
- Do not pick up or touch dead or sick wild birds. Leave sick birds alone, as handling them stresses them and will be an additional burden on the bird.
- Local authorities are responsible for collecting dead birds.
- It is prohibited to enter some areas due to the current outbreak of bird flu. These areas are Hornøya og Reinøya nature reserve, Andotten nature reserve and Eidvågen nature reserve.
